**MEDIA ALERT &
PHOTO OPPORTUNITY**

STEEL BEAMS ARE SCHEDULE TO BE DELIVERED ON MONDAY, JANUARY 12.

January 9, 2015 (Exeter, NH) – Work continues to at the new 33,000 square foot YMCA facility on Linden Street in Exeter. The final portion of the foundation walls were poured at the north side of the building on December 31. And, the old school foundation was used to complete the exterior and interior backfill on the south side of the building. Now that the foundation is in place, structural steel can be delivered and construction of the steel frame may begin and continue for an estimated four to five weeks.

WHAT: Structural steel is scheduled to be delivered – and unloaded by crane.

WHEN: Monday, January 12, 2015.

WHERE: 56 Linden Street, Exeter, NH 03833

PHOTOS: Due to the restrictions of a construction zone, media access is unauthorized in a hard hat area. However, photos may be captured from the parking lot located immediately adjacent (N, S, E, W?) to the project.

For your convenience, I plan to send a notification email when the truck has arrived. Let me know if you would like this information or if another person in your organization should receive this information.
